

Vacancy Junior Researcher

Description

As junior researcher you contribute to the development and application of transport models, and policy studies for our customers across Northwestern Europe. We seek a junior researcher with a passion for quantitative puzzles that can develop his- or herself into an advisor to our clients.

Your research activities consist of the analysis of large datasets, scripting, implementation of modelling code, model estimation, and presentation and reporting of research results. In addition to research tasks, you will also support the application of models in policy studies. You will be member of a small multi-disciplinary team of professionals with various analytical backgrounds such as physics, econometrics, civil engineering, economics. Independence, result-orientated, and commitment are key values in our team.

Skills

- MSc or PhD in quantitative discipline
- Strong interest in quantitative analysis
- Experience in computer programming
- Experience in (dedicated) analytical software packages such as SPSS, CUBE, VISUM, Omnitrans, ArcGIS.
- Good writing skills

Company profile

Significance is an independent research institute specialized in transport. It is established in The Hague. It works for clients in the Netherlands and throughout Western Europe. Significance's ambition is to provide analytical excellence with a strong emphasis on innovative modelling. It's core competences include transport demand forecasting, land-use/transport interaction, logistics, monitoring and evaluation, and stated preference research.

We offer

- Attractive conditions and possibilities for professional education
- Interesting (international) projects
- Professional, high level working environment
- Informal culture with a lot of space for individual initiative
